EMC Customer Training

CAS ValuePak Customer Training CE-VALPAK-CAS	£2,416.93
--	-----------

Hardware Maintenance

For this offer only the EMC Centera Hardware comes with:

- 3 year warranty
- 4 hour response time
- 24 hours a day
- 7 days a week
- 365 days a year
- ‘Dial home’ remote support

EMC will provide support during the 3 year warranty period subject to the PHYSICAL installation being carried out by EMC and supported by a valid customer service contract.

If the physical installation of any EMC products has not been carried out by EMC then there will be a set charge to the customer for a recertification of the products. If remote support has been declined there is 35% uplift on maintenance price.

Software Maintenance

For this offer only the EMC Centera Software comes standard with:

- 3 year warranty
- 4 hour response time
- 24 hours a day
- 7 days a week
- 365 days a year
- ‘Dial home’ remote support

EMC will provide support during the 3 year warranty period subject to the software installation being carried out by EMC and supported by a valid customer service contract.

If the physical installation of any EMC products has not been carried out by EMC then there will be a set charge to the customer for a recertification of the products. If remote support has been declined there is 35% uplift on maintenance price.

EMC CENTERA

EMC Centera for mid-size enterprises delivers fast, affordable, online access for all your unchanging digital information—so you can simplify and automate your e-mail environment, accelerate backup and recovery, and more. The ideal solution for your departmental and organizational archiving needs, EMC Centera for mid-size enterprises comes with 2.2 TB of usable capacity and fits into any EMC rack (including EMC CLARiiON)—or other industry-standard rack. And it’s competitively priced, so you get all the benefits of active archiving at a cost that fits your budget.

Single Unit Integration Quick Start Service

The EMC 4-Node Centera Integration Quick Start Service deliverables include the following:

- Implementation as defined in the Project Scope
- Configuration Guide documenting the implementation
- Test and Acceptance Plan
- Product Functional Overview session (based on the Test and Acceptance Plan) through demonstration of the EMC 4-node Centera system capabilities
- An operational EMC 4-Node Centera Single Cluster environment as defined in the Project Overview and Project Scope

Replication Integration Quick Start Service

The EMC 4-Node Centera Integration Service with Replication deliverables include the following:

- Implementation as defined in the Project Scope
- Test and Acceptance Plan, which may include a basic Functional Overview to demonstrate service capabilities
- Configuration Guide documenting the implementation
- An operational EMC 4-Node Centera(s) in a replication environment as defined in the Project Overview and Project Scope

EMC ValuePak - Training

ValuePaks are a cost-effective method of purchasing bundled EMC training for less than you would pay a la carte for the same curriculum. ValuePaks combine a number of e-Learning courses with one or more instructor-led courses, or in the case of Video ValuePaks, Video Instructor-Led Training courses.

CAS ValuePak CE-VALPAK-CAS

The CAS ValuePak provides comprehensive coverage of content-addressed storage technology as well as management of the Centera product. The ValuePak includes the CAS Management instructor-led course plus five e-Learning courses for added value.
