

Information Technology today is tactically addressing:

- Application upgrades and migration - inc. Microsoft, Oracle, ERP
- Server consolidation and Virtualisation
- Re-engineering back up infrastructure & deployment of DR
- Information lifecycle management including compliant archival
- Information security projects

To help companies meet the storage needs for these tactical projects, whilst ensuring the storage investment can grow into a strategic infrastructure, EMC has launched the following offer on the entry level Celerra NS352 NAS system.

EMC CLARiiON

NAS SOLUTION

Simplified clustered NAS storage
– replaces file servers and
virtualises data storage:

- Improved utilisation with virtual provisioning
- iSCSI connectivity for email and database support
- Local replication and worm functionality included

Solution includes:

- EMC Celerra NS352 NAS storage system
- 500GB capacity with hot spare scalable to 10TB
- Local replication - SnapSure for business copies
- Virtual provisioning & auto capacity expansion
- WORM drive functionality for permanent records
- Three years 4/24/7 hardware and software support
- Installation and connection to two hosts

NAS SOLUTION PRICE £17,499
